RE: RPZ Maintenance

Our records show you are overdue for the annual maintenance of your Reduced Pressure Zone (RPZ) backflow prevention device(s) connected to the City's water supply system.

RPZ backflow devices must be inspected annually. Testing can only be completed by those certified by the State of Minnesota to inspect back flow prevention devices. Maintenance must be conducted by a plumber licensed by the State of Minnesota.

An inspection tag shall be affixed to the device depicting the testing agency, date of test, certification number and signature of the certified technician. The City of Cottage Grove requires a written record of the maintenance report submitted in a timely manner. Reports may be emailed to ralt@cottagegrovemn.gov or mailed to the address below.

Please forward the test results to me by April 15, 2022. Failure to submit test results may result in your water service being discontinued.

Should you have any questions or concerns, please contact me at 651-458-2842.

Sincerely,

Rick Alt
Utilities Superintendent
